FLEX RESISTANCE	IUP 20	> 30000 cycles	No Cracks
COLOUR FASTNESS TO RUBBING	IUF 450	300 cycles dry	≥ 4 min (Grey Scale)
	IUF 450	30 cycles wet	≥ 4 min (Grey Scale)
FLAMMABILITY	BS 5853 – 1/79		Pass

DOMANI & BELLA PRODUCT INFORMATION:

Type: Semi Aniline
Source: Italy
Average Hide Size: 4.8m²
Thickness: 1.0 - 1.2mm

DOMANI is a premium leather, produced on the finest European hides. BELLA is a sister product, produced on the same premium raw material. Differentiated only in the finishing, both DOMANI and BELLA exhibit a unique handle and a distinctive texture.

The hides are tanned, dyed and then treated with an extremely light layer of pigment, without altering the natural grain surface of the hide. Both products offer outstanding softness, comfort, durability and cutting yield and showcase the beauty of leather's natural variations.

DOMANI & BELLA are wonderfully supple leathers, characterised by a fresh colour palette drawn from trends in the fashion industry.

All colours are in stock in our Australian warehouse and available for immediate off-the-shelf delivery.

Custom colours are available on request.

COMPANY ENVIRONMENTAL NOTES:

DOMANI & BELLA are produced by an ISO 14001 certified company. The tannery also carries the ISO 9001 Quality Certification. This tannery has pioneered the New Eco Spray System (NESS™) as part of the European Union's LIFE environmental projects. This project has fostered new tanning technology, reducing chemical wastage and emissions from the leather production process. Their commitment to the environment includes some of the most advanced waste management techniques in the industry.

DOMANI & BELLA leathers are produced using only water-based dyes.

All tannery wastage (liquid, gas and solid) is treated according to European Standards on-site and again at a shared off-site facility.

Detailed product and tannery environmental notes are available on request.
