COLOUR FASTNESS TO WATER	ISO 105-E01		5 min (Grey Scale)
COLOUR FASTNESS TO WATER SPOTTING	ISO 105-E07		5 min (Grey Scale)

SERIE 'A' PRODUCT INFORMATION:

Type: Corrected Grain
Source: Rino Mastroto Group
Average Hide Size: 4.8m²
Thickness: 0.9 - 1.1mm

SERIE 'A' is produced by very lightly buffing or 'correcting' the top layer of the leather before embossing a grain print onto the finished product. The pigmentation and embossing are very light, allowing the product to retain its breathability and supple handle.

Extremely tolerant to soiling and spillage, SERIE 'A' offers an affordable option for comfortable, quality furniture in any commercial or residential application.

All colours are in stock in our Australian warehouse and available for immediate off-the-shelf delivery.

Custom colours are available on request.

COMPANY ENVIRONMENTAL NOTES:

SERIE 'A' is produced by one of the world's leading tanners, the Rino Mastroto Group – an ISO 14001 Certified company. This ISO Standard recognises organisations that are committed to environmental management and operate in an environmentally sustainable manner.

The tannery also carries the ISO 9001 Quality Certification. Their assurance of environmental responsibility extends to a full annual Environmental Impact Audit which accompanies their annual financial statements. This unique practice set the global benchmark for transparency in the tanning industry. The Rino Mastroto Group utilises some of the most advanced waste management techniques in the industry, with all tannery wastage (liquid, gas and solid) treated to European Standards on-site and again at a shared off-site facility.

SERIE 'A' is produced using only water-based dyes.

Detailed product and tannery environmental notes are available on request.
