TIRO CARE INSTRUCTIONS (OILED ANILINE)

TIRO will require particular care and maintenance to continually offer the lasting beauty and comfort that only leather can provide.

Protect from direct sunlight, as prolonged exposure may cause the leather to fade over time. This is especially important with an oiled aniline leather.

Protect leather from direct heat sources and heating vents.

Vacuum regularly using soft brush attachments to remove dust & grit.

Remove spills by blotting with a soft & absorbent colourfast cloth.

We recommend the use of *Leather Master* or *Complete Leathercare* products for oiled leathers to spot clean and to revitalise your leather. To preserve the character and supple nature of your leather, we recommend using the *Leather Master* nourishment product *Oleosa* every three to four months – and more frequently in situations where there is heavy usage.

Do not use detergents, solvents or abrasive cleaners. Do not dry clean or machine wash.

Deterioration arising from incorrect or inadequate maintenance are not considered faults in the leather and will void any warranty.
